---

Hi all—

Gary, thanks for letting me know about the reporter call. He sent me the study a Texas A&M scientist just released regarding flooding risk, especially from hurricanes, at the San Jacinto waste pits site.

We don't really need to comment on this study, but the reporter also asked about EPA's assessment of flooding/storm risk and how it's factoring into our decisions at the site.

Can you help me put together a statement about this?

Thanks,  
Jennah Durant
